

Precision AirConvey: Engineering

Matrix and Trim Handling

Solutions

PAC
PRECISION AIRCONVEY

Remove

Convey

Densify

Precision AirConvey (PAC) reduces the difficulty on your production line and the overhead cost on your bottom line.

As a manufacturer of labels, you know firsthand how challenging—and costly—matrix scrap removal can be.

PAC systems work—all day, every day. With systems that are so surprisingly quiet, you'll want to see them in action to know they're working!

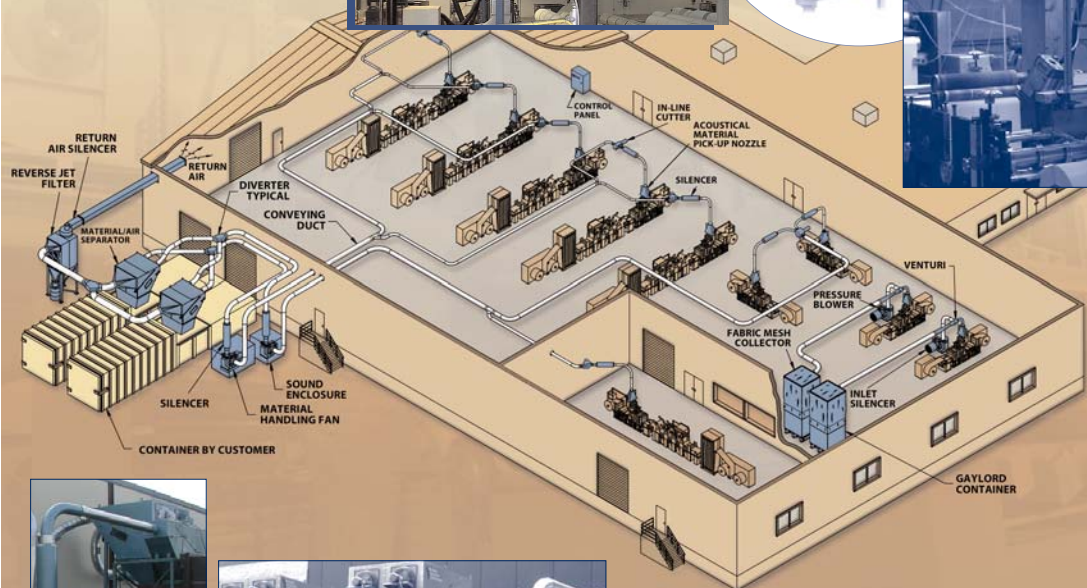

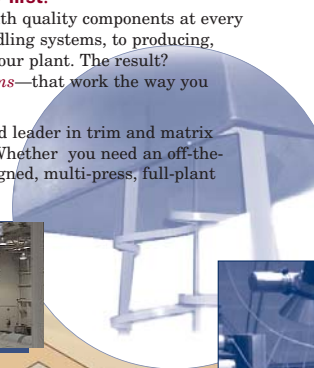

Engineering Brings Our Systems Together and Sets Us Apart

At PAC, we're an engineering company first.

We integrate our engineering excellence with quality components at every step. From designing trim and matrix handling systems, to producing, delivering and installing our solutions in your plant. The result?

Innovative, reliable and cost-effective systems—that work the way you need them to.

It's this strategy that's made PAC the world leader in trim and matrix removal for pressure-sensitive materials. Whether you need an off-the-shelf, single-press system or a custom-designed, multi-press, full-plant central system, PAC is your answer.

PAC *Where system installation is the beginning, not the end, of our customer service*

We Build In Quality and Service Up Front...

...because we want you to be as **satisfied with your system performance after years** of operation as you are the day it's installed. We want you to call on us to make the occasional adjustment or replace a guaranteed component. That's all part of our service commitment to you—we guarantee our systems will work. If they don't, we fix them. It's the quality of our systems that makes this exceptional service possible.

That's why 100% of our customers surveyed have positive things to say about PAC's products and services.

Innovative Systems Backed by Traditional Accountability

We're accountable for making sure the reasons you buy our systems are the same reasons you rely on them:

- Increase Space—Save room on your pressroom floor by eliminating bulky matrix collection carts and individual blowers.
- Increase Production Speeds—Eliminate press stops for waste roll removal. Remove matrix **without jamming and without tension breaks**.
- Increase Profits—Reduce power consumption. Prevent downtime and lost revenues.
- Improve Environment—PAC Systems are quiet. Plus, automating trim removal reduces injury risk.

Solutions That Solve Your Trim Problems and Save You Dollars

At PAC, we know your matrix-removal problem is different than your competitor's.

Our experienced engineers design our systems spec by spec, customer by customer—to give you an in-line system that's tailor-made for your operation. Call us to find out why a PAC solution is your best solution. **302 999 8000.**

PAC *Where system installation is the beginning,
not the end, of our customer service*

Here are Just a Few of Our Satisfied Customers:

Labels

3M Co.
Avery Dennison
CCL Label
Moore North America

Film and Sheet

Bemis
Pactiv
Tyco
Pliant

Converting

Cryovac
PrintPack
Proctor & Gamble
Huhtamaki

Paper

Kimberly Clark
Georgia Pacific
International Paper
Stor Enso

We Guarantee Results

We make it work. Our systems are 100% guaranteed to perform as specified without blockage or downtime issues.

Guaranteed for 24/7 operation, 100% of the time.
